

# PARKING TECHNOLOGY for Healthcare Facilities

**Your Patients, Your Guests, Your Staff:  
Improve your customers' parking experience.**

Parking is the last thing your patients, visitors and staff need to worry about.

With T2 Flex™, parking can be managed based on virtually any parameters that meet your organization's needs—giving your customers peace of mind by eliminating the hassle and worry of “where to park”.

- Improve customer experience with streamlined validations or coupons
- Quicken the exiting process and reduce labor costs with automated access and revenue control
- Create hassle-free access for physicians and staff with barcoded permits

## Control costs.

With escalating costs associated with developing and maintaining parking lots and garages, the need to control costs is more imperative than ever.

T2 Flex is ideal for healthcare facilities that:

- Want to charge a fee for parking.
- Need to control access to parking lots and garages.
- Need to monitor parking turnover and review historical trends for future expansion and construction planning, or
- Want to evaluate utilization or return on their parking investment.

**Cost control**

**Risk mitigation**

**Cost center reports**

**Sophisticated  
information**

**Superior  
data security**

## The most refined parking data for healthcare facilities

- Align parking costs with cost centers and departments
- Manage all facets of parking (patients, guests and staff) for every lot or garage within a hospital, medical center or system-wide

## Secure Access to All Parking Data

T2 understands the need for accurate, detailed reporting to stakeholders. T2 Flex is an intelligent, intuitive system that provides customizable reports to help you make important decisions about daily operations and plan long-range strategies.

With T2 Flex, you can take your operation to the cloud. When T2 hosts the solution, you no longer need to worry about IT management and administration, server equipment, database maintenance and backups, or security requirements.

## Common reporting for medical centers:

- Parking transactions by department
- Revenue by department or cost center
- Revenue by day/month/year
- Parking occupancy and turnover based on length of stay, fee paid or cost center
- History and trending data
- Other cost accounting and utilization reports

Your data is protected from fires, floods, theft, and power failures. You'll also realize ongoing real dollar savings because you won't need to invest in additional hardware or budget for future technology requirements.

T2 Systems has achieved **Level 1 PCI DSS (Payment Card Industry Data Security Standards) compliance** in its hosting environment. The compliance validation has dramatically reduced the workload and costs associated with pursuing PCI DSS compliance for your organization—required if your operation is taking credit card payments for parking.

### What is T2 Flex?

T2 Systems is a leading provider of parking management technology solutions, serving hospitals and medical centers throughout the country. The T2 Flex parking management system is a complete unified system for managing permits, enforcement, and all gated lots and facilities. Unlike other solutions, T2 Flex provides centralized management, reporting and operation from a single, cloud-based system, giving you access to all of your parking data anytime, from anywhere.

T2 Flex is a system made up of various components that work together to provide a complete parking solution. The system is fully scalable, meaning you can create your own solution by choosing from the suite of product packs and functionality that meets your specific needs. Other key features include:

- No limit to the number of parking facilities that can be managed and fully reported on within one system
- A fully relational database that allows data to be manipulated, linked and queried
- Easy-to-use navigation that allows users to easily perform activities through color-coded summaries, readily identifiable icons and context-sensitive menus
- ADA-compliance
- The ability to schedule automated tasks (including report generation)
- Access to all relevant information from any screen
- The use of secure and non-proprietary standards for network management and data encryption

## Turn your parking data into insights that help you improve your business processes
