

Concerts, sporting events and expos bring a large volume of vehicles into your parking lots. Without revenue control equipment in place you may be losing money and spending too much time reconciling revenue.

T2 Systems offers a unique event parking management solution. The T2 Flex system offers product packs designed to meet different needs, and the event management product pack - coupled with the T2 PermitNow handheld software - gives you a complete solution for managing event parking. Now you can issue parking permits in the field and enforce staff accountability without sacrificing parker convenience.

## PermitNow - Event Parking Management

### Issuing Parking Permits in the Field? No Revenue Control Equipment? No Problem.

Event parking no longer has to be a hassle or a source of lost revenue! T2's event parking management solution gives you better management of revenue from large events; it's revenue control where parking gates can't go.

PermitNow's complete audit trail gives you the ability to track parking transactions from every event - minimizing shrinkage while increasing revenue. Efficient reporting options slash your reconciliation time significantly. In just seconds, you can track the amount of revenue generated by each cashier and the payment method for each transaction.

#### Parker Convenience

Using PermitNow ensures easy, convenient parking for your patrons. The easy-to-use handheld software interface requires little to no previous handheld experience, and is designed to ensure your attendants can keep traffic lanes moving fast - it issues permits and receipts in under eight seconds. And you can accept different payment methods including cash, check and credit cards.

New online options allow you to pre-sell parking to those coming to your event or offer reservations by name. You can also track occupancy in real-time which means you can re-direct parkers to lots that have availability.

#### How It Works

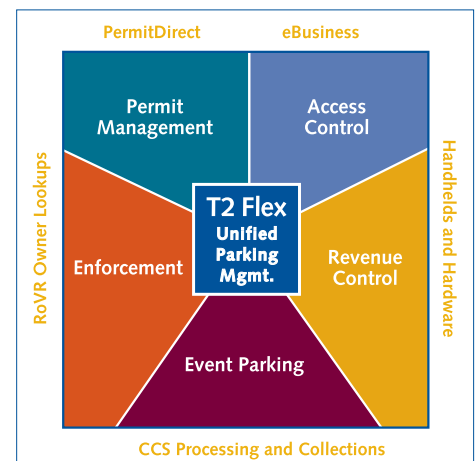

Parking attendants use the PermitNow handheld software to print uniquely numbered permits. A magnetic stripe reader is required to efficiently swipe credit. And the T2 Flex event management solution runs reports, tracks transactions, programs handheld configurations and exports information.

PermitNow allows you to develop custom configurations for each event. With this customization, you control the permit information and length; you control accepted payment types; and you control what you're selling (such as parking lot A, oversized lot, hats, T-shirts or other items).

#### Hardware Specifications

T2's PermitNow software can be used with several handheld devices, each with a variety of features and options designed to meet the unique needs of your operation:

- **Motorola-Symbol MC75:** a small handheld with environmentally-sealed QWERTY keypad; it also features barcode scanner and color image capture with auto-focus and flash.
- **Casio IT-3100:** a one-piece ticketwriter/printer unit that weighs less than 25 oz.; optional magstripe reader, digital camera and bar code scanner.
- **TDS Recon:** a lightweight unit with an extremely rugged design that's built to exceed military standards; optional magstripe reader, digital camera and bar code scanner.

### Powerful Parking Solutions from Parking Experts

Since 1994, T2 Systems has delivered proven parking solutions that meet the ever-changing needs of the parking industry. This commitment is demonstrated in T2's quality products and services, thought leadership and strong customer relationships. With its broad range of software, hardware, management and technology services, T2 Systems is trusted by more than 300 organizations in the US and Canada including universities, cities, towns, hospitals and airports.
