

Parking tickets with incomplete or missing information can lead to lost revenue. But with **RoVR (Retrieval of Vehicle Registrations)**, T2 Systems' registered owner look-up service, you can quickly locate the individuals responsible for unpaid parking tickets.

Available to both T2 PowerPark<sup>®</sup> and T2 Flex<sup>™</sup> users, RoVR is an easy add-on service that will help you dramatically increase your collection rate.

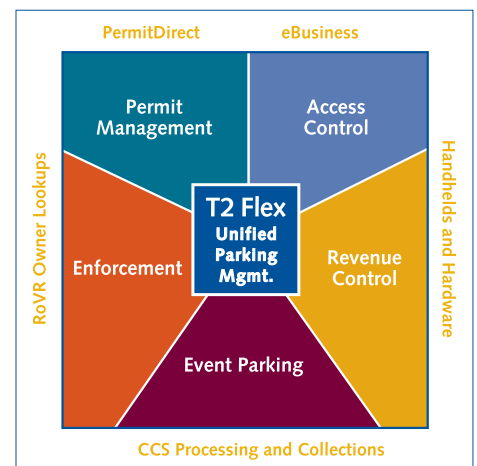

## T2 RoVR

### Retrieve Vehicle Registration Information - No More Lost Revenue

Now you can easily find the information you need to collect on unpaid violations. Because RoVR is an internet-based service, it allows you to quickly locate the individuals responsible for unpaid parking tickets without having to generate, print and mail reports, or manually enter registered owner information back into your database. And RoVR is easy on your budget because you only pay for successful look-ups.

The interactive wizard makes the entire process easy and hassle-free. RoVR does all the work of adding and updating customer, address and vehicle records. There's no manual data entry or data matching required - eliminating the possibility for errors. This helps increase the efficiency of your operation as your staff will now have more time for other important projects.

RoVR can identify owners from over 40\* states and the District of Columbia. The use of RoVR is subject to the Federal Driver's Privacy Protection Act, state and other applicable laws governing the dissemination of public records.

#### More T2 Solutions for You

T2 also offers technology-based processing and collection services through CCS - Citation Collection Services, LLC, a subsidiary of T2 Systems staffed by experts in parking and collections. CCS is another service designed to help you collect on outstanding debt, offering multiple levels of services so you decide how much work you want us to do and how much you want to do yourself. T2 utilizes a unified system approach that makes data equally accessible to the parking operation staff and CCS; both your staff and CCS staff work in the same application and have access to the same data.

#### Parking Solutions from the Parking Experts

Since 1994, T2 Systems has delivered proven parking solutions that meet the ever-changing needs of the parking industry. This commitment is evident in T2's quality products and services, thought leadership and strong customer relationships. With its broad range of software, hardware, management and technology solutions, T2 Systems is trusted by over 300 organizations in the US and Canada including universities, cities, towns, private operators and airports.

For more information about RoVR, CCS or any of T2's other parking technology solutions visit us on the web at [www.t2systems.com](http://www.t2systems.com). You can also call us at 800-434-1502.
