

T2 Flex is a single, unified system for parking management: enforcement, permits, access and revenue control and event parking. T2 Flex is the authoritative data source for everything related to parking, providing a unified platform that streamlines all parking tasks including: accounts receivable, residential and other permits, access cards and devices, citations, towing, monthly contract parking, and more. T2 Flex allows you to manage any and all parking-related data, providing centralized control, management, reporting and operation of all subsystems from one portal.

Credit Card In, Free Out Unattended Solution

Do you have visitor, commuter or other parking lots that you aren't able to enforce? Or is it too cost-prohibitive to pay an attendant or cashier to take payments? If you answered yes to either scenario, you're losing money that could be yours!

The T2 Flex parking management system is comprised of functionality packs that together make a complete, unified system. However, you only purchase the packs that meet your needs now knowing that your application can expand as your organization grows and changes. The "Credit Card In, Free Out" solution is a configuration of T2 Flex that is ideal for:

- Outlying areas difficult to enforce
- "Honor Lots" or areas where someone is being paid to take payments
- Premium parking (retail areas)
- Event parking areas not directly "connected" with the venue
- Commuter and/or visitor lots
- Highly transient areas with small time increments
- Smaller organizations with no enforcement personnel

Charlotte, North Carolina

The "Credit Card In, Free Out" option is an unattended solution that gives you the ability to collect more revenue without having to add cashiers. And because parkers **MUST** pay to get in, you're ensured 100% revenue and no "insufficient funds" or other payment problems. In addition, there's no need for enforcement personnel.

Hosted Solution

The T2 Flex solution is unique because T2 can host the complete solution for you. The result is an easy-to-deploy revenue control application that supports multiple locations with no on-site cashier staff, IT staff or other IT-associated resources and costs.

And because T2 Flex is a web-based solution, parking managers and facility owners can access all information about their parking operations from any computer with Internet access. T2 Flex provides revenue control functionality and reporting through an online system that enables you to monitor equipment and perform tasks at multiple locations from one central, remote command center.

Powerful Solutions from the Parking Experts

Since 1994, T2 Systems has delivered proven parking solutions that meet the ever-changing needs of the parking industry, and this commitment shows - in T2's quality of products and services, thought leadership and strong customer service relationships.
