

The T2 Flex PARCS solution includes high-quality, reliable revenue control equipment including ticket dispensers, credit card entry and exit stations and pay-on-foot stations.

T2 Revenue Control Hardware: Pay-on-Foot Station

Overview

The T2 pay-on-foot station reads and encodes magnetic stripe tickets and enables customers to process their parking fees without the aid of a cashier. The pay-on-foot station calculates and displays fees, accepts payment in coins and notes, issues change in coins and dollar bills, and provides patrons with a receipt of the transaction.

Functional Description

A parker inserts the encoded magstripe parking ticket into the pay-on-foot station. Based on the information on the ticket, the station calculates and displays the parking fee. The customer then pays the fee - in either coins, dollar bills or credit card - and the pay station will provide change as needed in coins and/or bills. If the accept/dispense of dollar bills was chosen, the unit escrows the bills to prevent laundering. The unit provides bill and coin recycle functionality which means that cash used in previous transactions is reused for future transactions. This eliminates the need for daily refilling of coins and bills. All transactions are sent directly to the T2 Flex parking management software, allowing for complete audit control.

Once the transaction is complete, the patron receives the validated ticket back and issues a payment receipt. To exit the facility, the customer inserts the validated ticket in the exit verifier. If the "exit time" has not elapsed, the exit verifier will open the exit parking barrier and the patron is allowed to leave the facility.

Basic Components

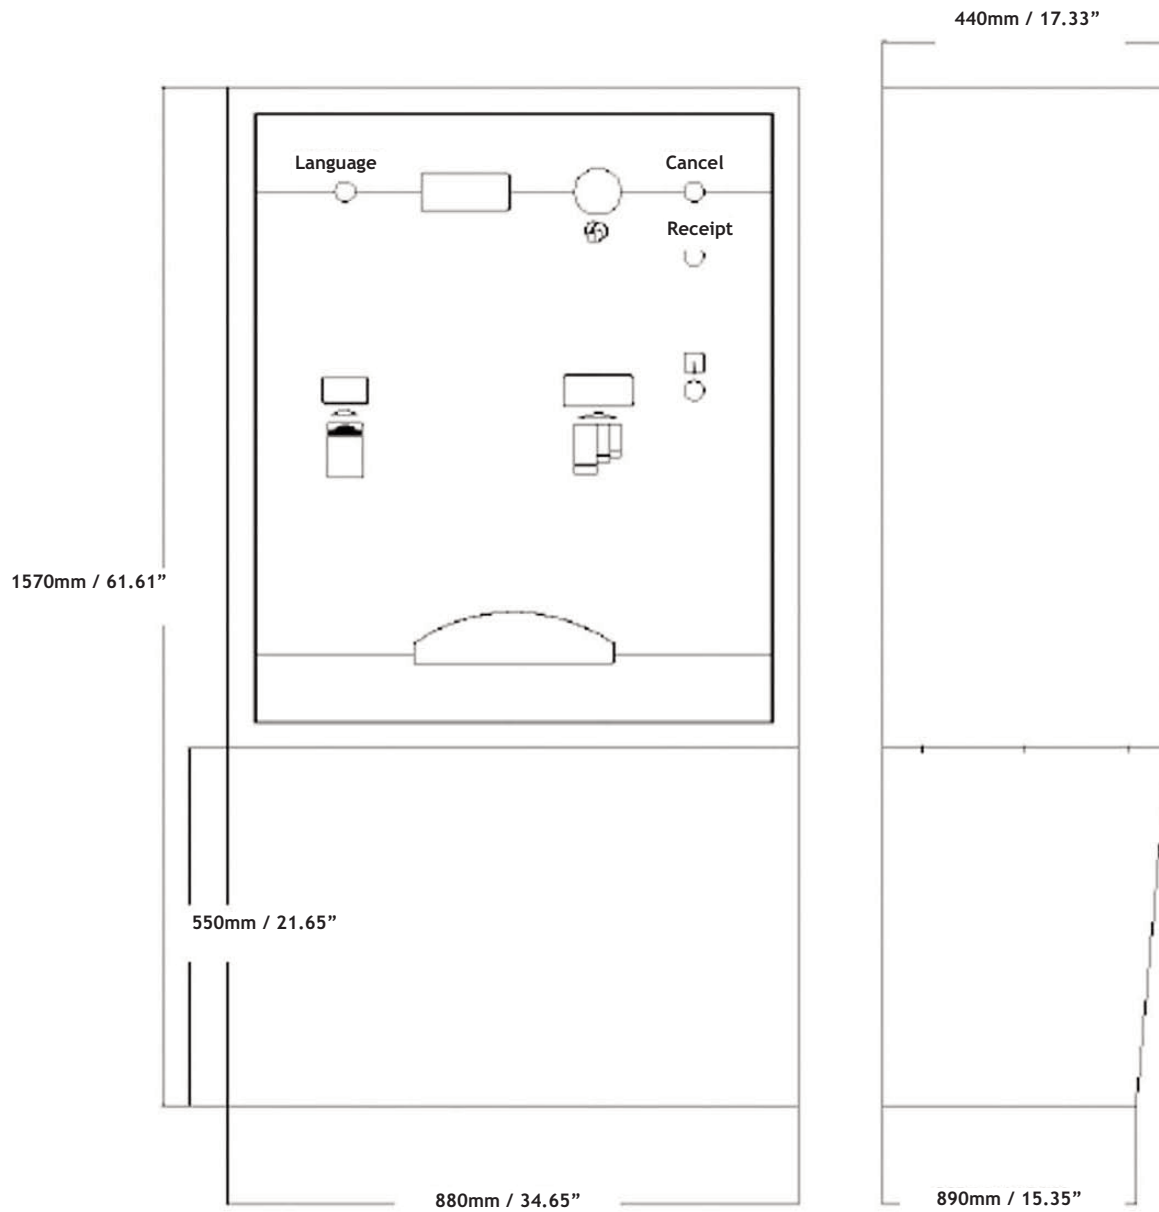

The pay-on-foot station consists of a weatherproof cabinet with an access door. The door is secured against intrusion using a five-point safety lock and alarm contact. The unit is designed to communicate with T2 Flex software using TCP/IP protocols and the software provides a comprehensive list of reports including cash balance audits, cash content reports, statistical reports and total amount reports.

Technical Data - Model #T21TK301A1

Housing Width	34.65 inches
Depth	17.33 inches
Height	61.81 inches
Weight	400 pounds
Secured Weatherproof Cabinet	Yes
Coin Acceptance and Recycling	Yes
Bill Acceptance and Recycling	Yes
Credit Card Acceptance	Yes
Backlit Buttons	Yes
Change Options	Yes
Multiple Languages	Yes
Lost Tickets	Yes

Dimensions: T2 Pay-on-Foot Station

Powerful Solutions from the Parking Experts

Since 1994, T2 Systems has delivered proven parking solutions that meet the ever-changing needs of the parking industry. For more information on how T2 Systems can help you manage your parking more efficiently, call 800-434-1502 or visit us on the web at www.T2systems.com.
