

Think T2, and think how your life just got easier.

Whatever your obstacle, we have the solution.

Managing parking is a challenge—your job is to make it easy for your customers and our job is to make it easy for you. T2 Systems offers a full suite of parking management solutions, from permit and citation management, to collections, to access and revenue control, and full data integration. All delivered with the responsive and knowledgeable service and support you can only get from T2.

With the ability to “build” the solution you need, it’s always the right fit.

Do you want the power of the gatekeeper? Open sesame.

T2 Flex Access and Revenue Control

It’s like magic—a web-based solution that allows you to completely manage all of your gated facilities right from your chair. Surface lots, parking garages and event parking areas can be under your spell with flexible software and reliable, easy-to-maintain hardware including gates, point-of-sale and pay-on-foot stations.

And because it’s T2 Flex, you’ll be able to track access devices, permits, citations and all parking revenue from a single database—eliminating repetitive data entry and unifying all financial reporting.

Do you need control of your citations and permits? Get street smart.

T2 Flex Permits and Enforcement

There are a limited number of hours in the day—and you need to make the most of them. Gain control with our Permit Management solution and Enforcement solution. Set-up, issue, track and manage permits for individuals, groups or properties. The Enforcement solution allows you to enforce your parking rules with real-time access to all information associated with a citation—customer, vehicle, payments, appeals—and to your pay-by-space system.

Since it’s T2 Flex, you can also manage gated facilities or event parking areas in the same database that’s integrated with handhelds and other software. All through a single unified solution.

Expecting 45,000 people at your next event? No sweat.

T2 PermitNow

From concerts to sporting events, T2 PermitNow brings improved revenue and audit control to places gates can’t go—an open field, gravel lots, you name it. It makes event parking fast and easy for parkers, including online options for pre-ordering and payment. And PermitNow can help eliminate cash trail and auditing hassles that often come with event parking.

Built on T2 Flex, T2 PermitNow allows you to use the same handhelds you use for enforcement, and tie all activities with your gated facilities. It simplifies event parking like you never thought possible.

Need online solutions? Hardware? Even collections? We’ve got your back.

Add-On Solutions

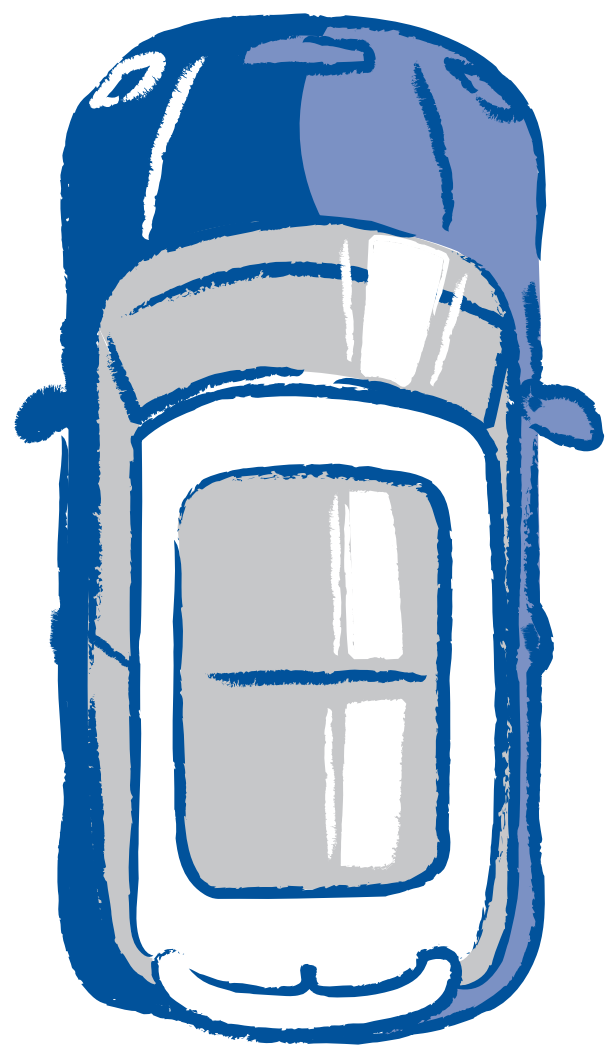

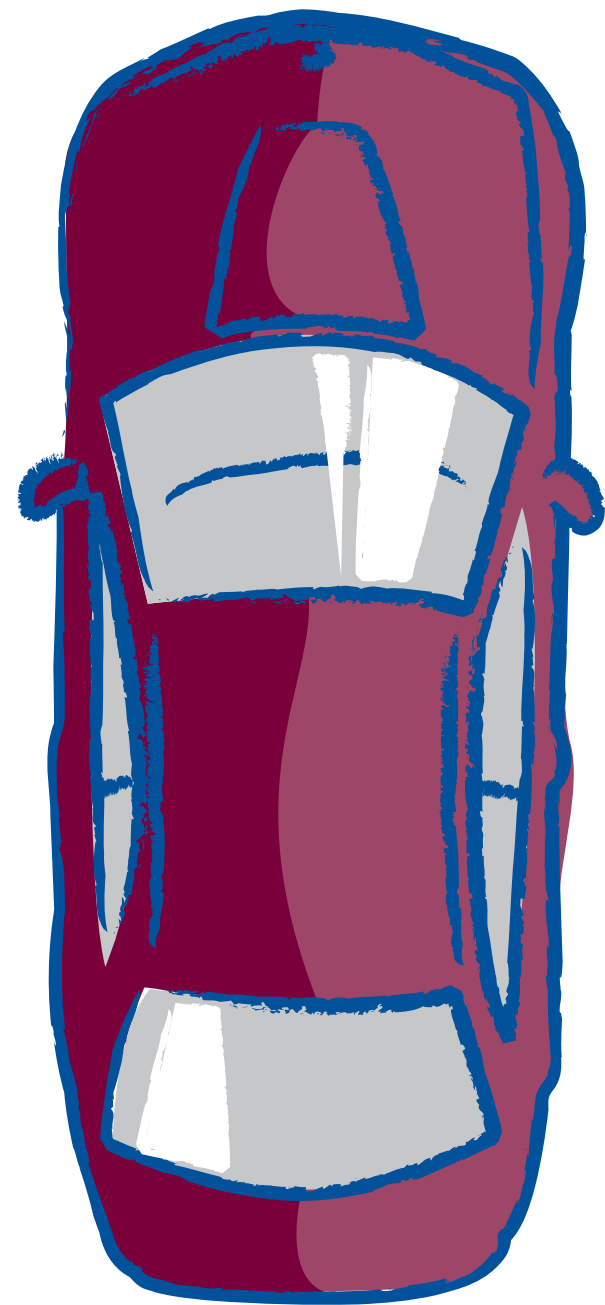

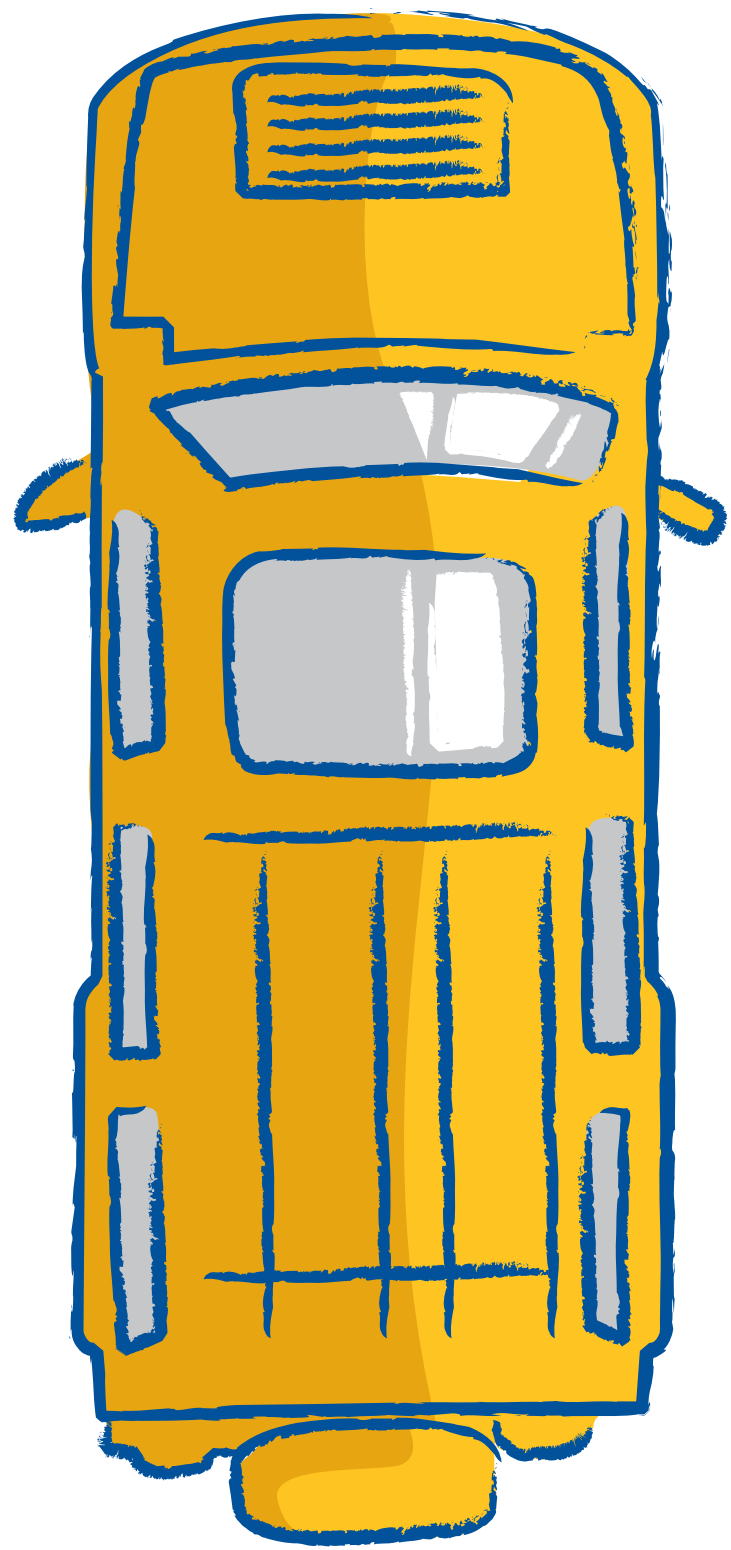

- PermitDirect—a permit ordering and fulfillment service offered in partnership with Weldon, Williams & Lick.
- e-Business—conduct all of your customer interactions online. Enable your customers to purchase permits, pay citations, submit appeals, check waitlists and manage accounts with the click of a mouse.
- Handhelds and Hardware—T2 partners with a variety of suppliers to offer handhelds and hardware that integrate seamlessly with all of your parking management solutions.
- CCS Processing and Collections—let us do the legwork of following up on unpaid citations. We can increase your collection rate and help you get paid.
- RoVR Owner Lookups—electronic retrieval of vehicle registrations. Now you know who has violations and can follow-up to secure payment and reconciliation.

If it has anything to do with managing parking, think T2.

We have the solutions you need, and they’re all part of T2 Flex.

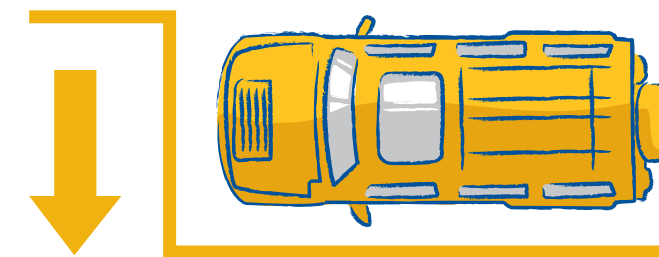

A variety of solutions—each of which is sure to meet your parking demands. But here’s the beautiful thing: they’re all part of T2 Flex, the industry’s first unified parking management solution. This means that no matter what your situation today, you will be able to expand your services as your requirements change. More importantly, each and every solution you choose—now and in the future—is part of T2 Flex. There’s no need for multiple, different systems. All you need is one solution.

Think unified parking management. **Think T2.**
