MEDIA RELEASE

T2 Systems Announces Partnership with Genetec

(INDIANAPOLIS, IND.— June 11, 2010) T2 Systems is pleased to announce a new strategic partnership with Genetec. Recognizing Genetec’s position as a leader in IP security and license plate recognition (LPR) solutions, T2 is excited about this new alliance and the joint solution that will benefit both Genetec’s and T2’s customers and the parking industry in general.

T2 is continually looking for ways to help customers bring together all aspects of their parking operation, and that’s why the T2 Flex unified parking management system was designed in a way that allows efficient integration with other systems and solutions. The partnership with Genetec has allowed for integration between T2’s enforcement solutions and Genetec’s AutoVu license plate recognition (LPR) solution.

This integration enables officers to issue citations from the same computer that runs the AutoVu Patroller software using T2 eTicketBook software, with data seamlessly flowing between the two systems. The AutoVu solution will automatically collect license plate information, compare it against parking enforcement databases and then alert operators of vehicles in violation. Upon an alert, the operator only needs to press the “Enforced” button to pre-populate the citation entry in T2 eTicketBook and quickly issue the citation. The citation is then transferred into T2 Flex for further processing.

This partnership is the result of both companies listening to their customers and delivering the solution customers want. “We are quite excited about the integration of LPR technology into the T2 Flex family,” said David Hill, Chief Operating Officer of the Winnipeg Parking Authority. “As a current AutoVu user, it will certainly make our permit programs easier to enforce, and our timed parking zones more accessible.”

“We are very excited about our partnership and new working relationship with Genetec,” said Irena Goloschokin, Executive VP of Strategy and Products for T2. “They are a leader in LPR technology and our partnership will give new options to those in the industry searching for efficient enforcement solutions. We look forward to what this relationship will bring to both municipalities and universities.”

-more-

“We are pleased about our new partnership with T2 Systems, as we are able to work with a very reputable company to deliver even more innovative solutions to our customers,” said Larry Legere, AutoVu Sales Manager—North America at Genetec. “The integration between AutoVu and T2 eTicketBook ultimately offers our customers an innovative and highly-efficient parking management and ticketing system.”

About Genetec

Genetec is a pioneer in the physical security and public safety industry and a global provider of world-class IP video surveillance, access control and license plate recognition (LPR) solutions to markets such as transportation, education, retail, gaming, government and more. With sales offices and partnerships around the world, Genetec has established itself as the leader in innovative networked solutions by employing a high level of flexibility and forward-thinking principles into the development of its core technology and business solutions. Genetec’s corporate culture is an extension of these very same principles, encouraging a dynamic and innovative workforce that is dedicated to the development of cutting-edge solutions and to exceptional customer care.
