MEDIA RELEASE

T2 Systems Completes First Phase of Installation at Super Park Off-Airport Facility at Hobby Airport in Houston, Texas

(INDIANAPOLIS, IND.— September 29, 2011) T2 Systems Inc. is proud to announce that it has completed the first phase of its T2 Flex installation at Super Park, a large off-airport facility in Houston, Texas. The T2 Flex PARCS hosted solution includes software and hardware designed to help streamline Super Park's internal processes and reporting, while enabling it to offer more convenient, automated parking options to its customers.

This project marks T2's entry into the off-airport market and brings the Super Park facility one step closer to meeting its goal of implementing an automated unified solution that will offer the following: nested entry and exit areas that allow for tiered pricing and market segmentation, barcoded coupons with online delivery, customer loyalty programs via a web-enabled system, and online reservations for patrons - all in a cashier-less environment with bi-directional real-time communication between the online components and the PARCS system.

Although the complete solution will be implemented in phases, T2, Hammerschlag & Co., Inc. - the leader of the investor group that owns the Super Park off-airport facility, and Ampco System Parking, its operator - are excited about this endeavor and the new functionality the solution will provide.

"T2 has demonstrated a passion and determination which matches our ambitions for Super Park," said John Hammerschlag, President of Hammerschlag, Inc. "T2 is interested in our vision for Super Park and has a staff deep enough to deliver", he said.

After acquiring Super Park, John Hammerschlag analyzed the potential of this specific garage and off-airport parking in general. Experienced in converting and implementing automated parking systems in numerous facilities in Chicago and around the country, Hammerschlag sought a partner that would work closely to develop and implement a parking solution designed specifically for Super Park's needs.

-more-

“We are thrilled that Hammerschlag & Co., Inc. chose T2 Systems as its partner for the Super Park off-airport facility,” said Mike Simmons, Co-founder and CEO of T2 Systems. “We share a vision of using the latest technology to help improve the overall parking experience for today’s busy travelers, and we look forward to working with them to make this a reality at Super Park,” he said.

About T2 Systems

Since 1994, T2 Systems has delivered proven parking solutions that meet the ever-changing needs of the parking industry. This commitment is evident in T2’s quality products and services, thought leadership and strong customer relationships. With its broad range of technology-based solutions, T2 Systems is trusted by more than 350 organizations in the US and Canada including universities, cities, towns, hospitals and airports. T2 Systems is headquartered in Indianapolis, Indiana and has virtual offices throughout the United States and Canada.
