MEDIA RELEASE

T2 Systems Promotes Linda Kauffman to Vice President of Industry Solutions

Kauffman promotion part of recent T2 Systems restructuring in which Irena Goloschokin named Executive Vice President of Strategy and Products and Blake Laufer returns to Vice President of Product Development role.

(INDIANAPOLIS, IND.— June 22, 2009) T2 Systems Inc. is pleased to announce that it has promoted Linda Kauffman to the role of Vice President of Industry Solutions. Kauffman, who joined T2 Systems after serving as the executive director of the Allentown Parking Authority, will be in charge of customer training, content management as well as product management.

Kauffman's VP role is new and is part of a restructuring initiative which brings operational industry experience and knowledge of customer needs closer to Product Development and corporate IT, which manages T2's hosting environment. As part of the reorganization, Irena Goloschokin, who has served the company as Vice President of Marketing for 8 years, has been promoted to Executive Vice President of Strategy and Products. Kauffman, Laufer and Jim Hutchins, T2's CIO, now report directly to Goloschokin.

Kauffman brings more than 20 years experience in parking management to T2 Systems, including time as the Chair of the International Parking Institute. She has served T2 as an industry consultant and most recently as the Manager of Content Management and Training, offering her experience and knowledge to T2 customers through training workshops, online webinars and customized consulting. In her new position, she will take on a more active role in product strategy and planning.

"I'm excited to have Linda on the T2 Leadership Team where she will play a more active role in planning the company's product and solution strategy for the future," said Mike Simmons, T2 Systems' President and CEO. "Her industry knowledge and experience as a former customer are invaluable and will help us remain customer focused."

- more -

Laufer, who has been serving as the company's Chief Technology Officer and director of product management, returns to his previous role as Vice President of Product Development. This is a familiar role, as Laufer led T2's R&D group when joining the company in 1999.

The new team led by Goloschokin includes Kauffman's group, as well as Product Development, IT and Technology, and Marketing and Corporate Communications.

"I'm excited about my new role and leading this team of experienced professionals," said Goloschokin. "This reorganization will benefit T2 customers in many ways by bringing all key departments that are responsible for the development of products and solutions for our customers into one team that will work closely together."

About T2 Systems

Since 1994, T2 Systems has delivered proven parking solutions that meet the ever-changing needs of the parking industry.
