MEDIA RELEASE

T2 Systems Now Delivers a Complete Unified PARCS Solution Including Hardware under the T2 brand

(INDIANAPOLIS, IND.— May 3, 2010) T2 Systems Inc. is pleased to announce that it has expanded its T2 Flex PARCS solution to include T2 brand revenue control equipment. This means that the complete T2 Flex PARCS system, both software and hardware, will now come from T2.

The complete solution will be provided by T2 and installed and supported by T2 together with local distributor partners. Ultimately, this means that both current and future T2 customers now will have one system provided by one vendor.

“This is exciting news for T2 Systems and we hope the parking industry in general,” said Mike Simmons, co-founder and CEO. “Working closely with our distributor partners, T2 offers parking operations a new way of doing business as it relates to the purchase, installation and maintenance of their PARCS solutions - a hosted, unified parking management solution that enables parking operations to create a command center that runs multiple facilities located close by or as far as another state.”

The T2 Flex PARCS system incorporates web-based software and state-of the art hardware components including retail industry standard POS devices, custom-manufactured Pay-on-Foot devices, as well as vehicle barriers and many key components provided to T2 Systems under an exclusive OEM agreement with Magnetic Automation. Magnetic has been providing equipment for the T2 Flex PARCS solution since 2005.

“We too are very excited about this change in our relationship with T2 Systems,” said Stefan Tea, Vice President, of Magnetic Autocontrol. “We now are in a much better position to focus on our core business of access control. We’ve built our reputation on providing high-quality, virtually maintenance-free gates and barriers and we look forward to continuing to provide those solutions to all of our partners in a variety of markets.”

-more -

A first in the industry, the T2 Flex system unifies all aspects of parking management and many cities, universities and private companies from around the country are using the system to not only manage garages and other gated facilities, but also their event parking, permits, citations and other enforcement activities. T2 Flex is also the first PARCS solution that can be completely hosted by T2.

About T2 Systems

Since 1994, T2 Systems has delivered proven parking solutions that meet the ever-changing needs of the parking industry. This commitment is evident in T2's quality products and services, thought leadership and strong customer relationships. With its broad range of technology-based solutions, T2 Systems is trusted by more than 300 organizations in the US and Canada including universities, cities, towns, hospitals and airports. T2 Systems is headquartered in Indianapolis, Indiana and has virtual offices throughout the United States and Canada.
