T2 Systems Announces Successful “Pay Park & Go” Parking Solution

T2 Systems and Standard Parking provide hosted revenue control solution enabling revenue generation at locations with no on-site parking staff.

(INDIANAPOLIS, IND.— July 8, 2009) T2 Systems Inc. is pleased to announce the deployment of a new “Pay Park & Go” parking solution, developed in partnership with Standard Parking. A parking industry-first, this revenue control application uses credit card pay-on-entry for unattended, access controlled parking areas. Standard Parking’s objective behind the project was to develop a system that could convert historically free, unstaffed parking areas, such as those typically found in suburban retail malls, into revenue-generators through the sale of preferred parking privileges.

The result is an easy-to-deploy revenue control solution - hosted by T2 Systems - that supports multiple locations with no on-site IT or cashier staff. The T2 application provides revenue control functionality and reporting through an online system that enables Standard Parking, from one central, remote command center, to monitor equipment and perform tasks at multiple locations. The “Pay Park & Go” solution is being used successfully at locations in Charlotte, NC and New Orleans, LA, with more planned in the near future.

The parking solution is built on T2 Flex, the industry’s first unified parking management system. T2 Flex unifies in one single database the management of access and revenue controlled facilities with the management of event parking, permits and citations. The web-based solution allows parking facility owners and managers to access all information about their parking operations from any computer with Internet access.

“We’re very excited about the success of this project and our partnership with Standard Parking,” said T2 President and CEO Mike Simmons. “We’ve been developing and preparing to launch our hosted revenue control solution, and with Standard Parking’s history of supporting innovative, new technology, we’ve jointly developed this solution to meet the needs of their clients now and in the future.”

Standard Parking's President and CEO, James A. Wilhelm, in commenting on the project's success, stated that "Standard Parking has always looked for new, innovative solutions that meet the evolving needs of our clients. We're excited about 'Pay Park & Go', and look forward to working with T2 in the future on other projects that can benefit our parking clientele."

About Standard Parking

Standard Parking is one of the nation's leading providers of parking management, ground transportation and other ancillary services. The company, with more than 12,000 employees, manages approximately 2,200 facilities, containing over one million parking spaces in more than 330 cities across the United States and Canada, including parking-related and shuttle bus operations serving approximately 60 airports.

About T2 Systems

Since 1994, T2 Systems has delivered proven parking solutions that meet the ever-changing needs of the parking industry. This commitment is evident in T2's quality products and services, thought leadership and strong customer relationships. With its broad range of technology-based solutions, T2 Systems is trusted by more than 300 organizations in the US and Canada including universities, cities, towns, hospitals and airports. T2 Systems is headquartered in Indianapolis, Indiana and has virtual offices throughout the United States and Canada.
