

Concerts, sporting events, and expos bring a large volume of vehicles into your parking lots. If you don't have revenue control equipment in place, you're losing money and spending too much time reconciling revenue.

With T2 Systems' PermitNow, you can enforce staff accountability without sacrificing parker convenience. PermitNow is an easy-to-use, comprehensive solution for those responsible for managing, coordinating and providing parking for events. Its complete audit trail gives you the ability to track parking transactions from every event - minimizing shrinkage while increasing revenue.

## PermitNow - Event Parking Management

### Issuing Parking Permits in the Field? No Revenue Control Equipment? No Problem.

PermitNow's easy-to-use handheld software interface requires little to no previous handheld experience, yet your attendants can keep traffic lanes moving fast as it issues permits and receipts in under eight seconds. And you can accept cash, check, credit and debit card payments.

Efficient reporting options will slash your reconciliation time significantly. In a matter of seconds, you can generate reports to track the amount of revenue generated by each cashier and the payment method for each transaction.

You also have the ability to develop custom configurations for each event. With this customization, you control the permit information and length; you control accepted payment types; and you control what you're selling, such as parking lot A, oversized lot, hats, T-shirts, or other items.

#### How It Works

Parking attendants use a handheld ticketwriter to print uniquely numbered permits. A magnetic stripe reader is required to efficiently swipe credit and debit cards. The PermitNow in-office software on a traditional PC workstation runs reports, tracks transactions, programs handheld configurations, and exports information.

#### Hardware Specifications

T2's PermitNow software can be used with either the Casio or TDS Recon Handheld Ticketwriters. Each offers a variety of features and options designed to meet the unique needs of your operation:

- The Casio IT-3000 is a one-piece ticketwriter/printer unit that weighs less than 25 oz.; offers an optional magstripe reader, digital camera and bar code scanner.
- The TDS Recon is lightweight with an extremely rugged design that's built to exceed military standards; also offers an optional magstripe reader, digital camera and bar code scanner.

More details about each handheld ticketwriter can be found on the T2 website at [www.t2systems.com](http://www.t2systems.com).

#### Powerful Parking Solutions from Parking Experts

Since 1994, T2 Systems has delivered proven parking solutions that meet the ever-changing needs of the parking industry. This commitment is demonstrated in T2's quality products and services, thought leadership and strong customer relationships. With its broad range of software, hardware, management and technology services, T2 Systems is trusted by more than 300 organizations in the US and Canada including universities, cities, towns, hospitals and airports.
