

T2 LOGAN™

PAY-ON-FOOT STATION (CREDIT, CASH, AND COIN)

T2 Logan is our next generation of PARCS, which communicates with the T2 Flex cloud-based software system. It is designed specifically for all gated parking solutions in vertical markets such as airports, healthcare, municipalities, property management, and universities.

The pay-on-foot station reads a barcode parking ticket, calculates parking fee, takes payment, and issues a paid ticket to exit the facility. Inserted QR barcode tickets prompt fee calculation and payment according to an operation's customized rate structure and validation/coupon program. Payment is accepted via magstripe or EMV card payment processing, cash, or coin. With its new modern design, there is a large front service door and recessed user interface panel, which allows for easy maintenance.

Key Features

- Large touch screen display (12.1") makes it easy to read and enter information
- Thermal QR-coded tickets for high read rate
- Optional ingest or non-ingest ticket processing
- Customizable voice prompts and messaging to guide user experience
- Full range of intercom system and video options for great customer experience and support
- Area imaging barcode scanner provides ability to use smartphones and pre-printed barcodes
- Universal gray or custom colors/wraps available
- Full offline functionality
- TCP/IP communication
- Thermal receipts printed on customer demand

ABOUT T2 SYSTEMS

T2 Systems is the largest parking technology provider in North America, with more than 24 years in the parking industry and currently serving thousands of parking professionals. T2 integrates the best people, processes, and technology for powerful, high performance, and secure parking solutions. Its open technology and processes are used to manage more than 200 million parking transactions for over 2 billion dollars annually across all 50 states and ten provinces in Canada. Customers rely on T2 for multi-space pay stations, permit management, enforcement, LPR, PARCS, business intelligence, vehicle counting, citation services, and event parking.
