

T2 Tempo™

PERSONALIZED PARKING MADE EASY

As workplaces and schools continue to shift to remote or hybrid schedules, more and more workers, staff, and students seek parking for specific days and times – not every day for an entire month, semester, or year. In this environment, parking operations are looking for ways to accommodate their customers while steadying streams of revenue and keeping spaces filled.

T2 Tempo provides flexible parking options for workers, staff, and students, and maximizes space utilization and turnover in parking facilities. The solution, an easy-to-use online platform, allows customers to purchase parking for specific days and times, either on a one-time, concurrent, or non-concurrent basis. It's just as easy for parking operations to configure facility limits and schedules on the back-end, while optimizing pricing based on demand.

KEY FUNCTIONALITY

TIME-BASED PARKING

Allow customers and known parkers to pay for what they need — offer 15-minute to 24-hour increments and non-consecutive days.

NO APP TO DOWNLOAD

Easy to set up web app that fully supports white labeling. Requires no download or special devices; a simple QR code or URL is all that is needed for operators and parkers.

ENHANCED WITH T2 FLEX®

With Tempo, Flex users can offer exclusive parking rates or specific locations to specific customer groups or individuals. For example, a student may be assigned a different hourly rate than faculty.

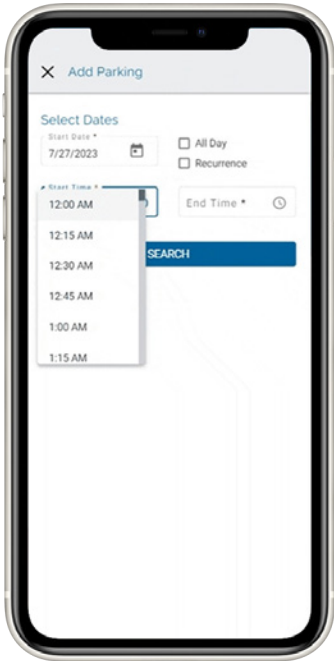

POWERED BY T2 UNIFI®

Tempo is integrated with T2 UNIFI environment which allows seamless single sign-on across other T2 System solutions for both the end user and the operator.

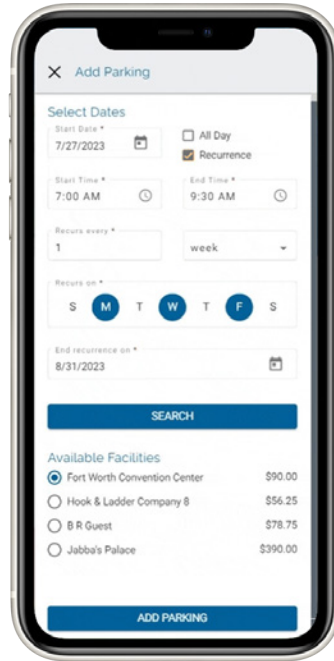

HOW IT WORKS

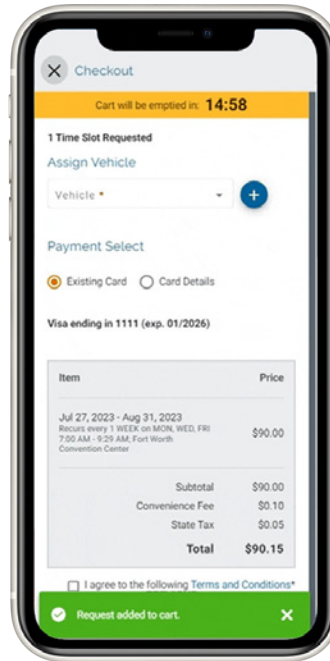

STEP 1: SELECT START & END TIMES

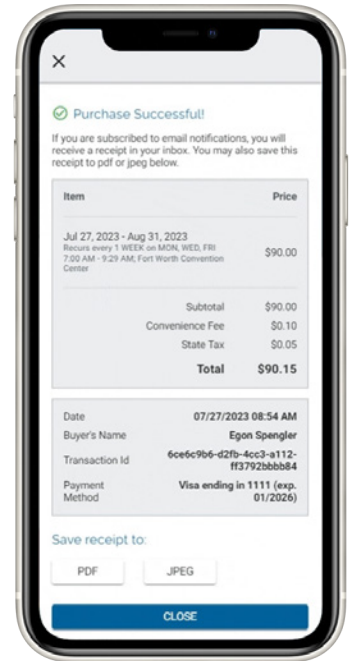

STEP 2: SELECT RECURRING DAYS

STEP 3: CONFIRM RESERVATION

STEP 4: PAY FOR WHAT YOU NEED

BENEFITS FOR PARKERS

- Pay for what you need
- Purchase parking for specific days and times, either on a one-time or recurring basis
- Intuitive, browser-based, self-service platform
- Parking reserved in just a few clicks
- No app to download
- Easy to use interface with a simple payment process
- Easily see which locations have parking available

BENEFITS FOR OPERATORS

- Flexible parking options for your students and staff that improves customer experience
- Generate more revenue by selling smaller increments of parking for a higher price
- Maximize space utilization and turnover
- Easy configuration for facility limits and schedules
- Optimize pricing based on demand
- 100% white label included at no additional cost
- Provides more accurate data for planning future parking needs

ABOUT T2 SYSTEM, A VERRA MOBILITY COMPANY

T2 Systems, a Verra Mobility Company, is the largest provider of parking and mobility solutions in North America.
